 AB - JP2002344919 NOVELTY - A judgment unit judges whether the
 report created by a lecturer, is transmitted to a conference system.
 An admission unit admits the lecturer to log-out, when the report is
 transmitted to the conference system.
 - USE - Internet-based log-out system for use in educational
 meetings.
 - ADVANTAGE - Enables a management person to easily manage
 the meeting attendants.
 - DESCRIPTION OF DRAWING(S) - The figure shows the flowchart
 explaining the log-out process. (Drawing includes non-English
 language text).

 TI - LOGOUT SYSTEM IN CONFERENCE UTILIZING COMMUNICATION

- AB
- PROBLEM TO BE SOLVED: To provide a logout system in a conference utilizing communication that can easily manage conference participants.
 - SOLUTION: In the conference system where users respectively login a communication channel to conduct a conference utilizing communication, the logout system in the conference utilizing communication discriminates whether or not a lecturer at least one of a plurality of users creates a report and whether or not the lecturer transmits a report to a conference system manager, and permits logout of the lecturer when the lecturer transmits the report to the system manager.
